Issue 2 – April 2023

We are aiming to improve communication between people with disability and health care workers.

People with **disability** can have trouble **communicating** about their health needs.

We want to:

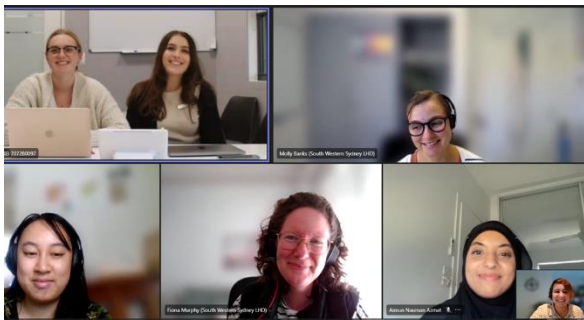

- Make it easier to talk about your health
- Make it safer

Project Update

The project is making progress.

We have had lots of meetings to plan the next steps.

We had 4 Speech Pathology Students join us.

They came to Campbelltown and Orange.

This is Aimun and Isabelle.

They said this project will help them be better Speech Pathologists.

This is Kelly and Chloe.

They enjoyed learning about supporting people with communication disabilities.

Visiting the Emergency Department

Aimun and Isabelle visited Campbelltown ED.

They met Kerri who is **Patient Experience Officer**.

A **Patient Experience Officer** helps people while they wait to see the doctor or nurse.

Kerri **answers questions or worries** you might have.

Visiting Oral Health

Kelly and Chloe visited Oral Health in Orange and Parkes.

They learnt about the good work the staff are doing there to make communication better.

They got to see what dentists, dental assistants and oral health therapists do.

It can be hard to talk when you are at the dentist.

The staff work hard to make it as easy as possible.

If you have **questions** about the project.

Please **email**:
